

# Intel Server Board M50CYP2SB1U - motherboard - Intel - Socket P4 - C621A

Ikke på lager

|                         |                                                                       |
|-------------------------|-----------------------------------------------------------------------|
| SKU                     | M50CYP2SB1U                                                           |
| Produktbeskrivelse:     | Intel Server Board M50CYP2SB1U - bundkort - Intel - Socket P4 - C621A |
| Produkttype:            | Bundkort                                                              |
| Processor:              | Intel                                                                 |
| Chipsættype:            | Intel C621A                                                           |
| Processor-socket:       | 2 x Socket P4                                                         |
| Kompatible processorer: | Xeon Gold, Xeon Silver, Xeon Platinum (Maksimal TDP 270 watt)         |
| Max RAM-størrelse:      | 12 TB                                                                 |

## Generelt

|                         |                                                               |
|-------------------------|---------------------------------------------------------------|
| Produkttype:            | Bundkort                                                      |
| Processor:              | Intel                                                         |
| Chipsættype:            | Intel C621A                                                   |
| Processor-socket:       | Socket P4                                                     |
| Max antal processorer:  | 2                                                             |
| Kompatible processorer: | Xeon Gold, Xeon Silver, Xeon Platinum (Maksimal TDP 270 watt) |

## Understøttet RAM

|                                  |                                                              |
|----------------------------------|--------------------------------------------------------------|
| Maks. størrelse:                 | 12 TB                                                        |
| Teknologi:                       | DDR4                                                         |
| Understøttet RAM-integritetskon: | ECC                                                          |
| Registreret eller buffer:        | Registreret, Load-Reduced, 3DS Load-Reduced, 3DS-registreret |

## Grafik

|                            |        |
|----------------------------|--------|
| Dedikeret videohukommelse: | 128 MB |
|----------------------------|--------|

## Producentgaranti

|                    |                          |
|--------------------|--------------------------|
| Service & Support: | Begrænset garanti - 3 år |
|--------------------|--------------------------|

## Diverse

|         |           |
|---------|-----------|
| Bredde: | 42.798 cm |
| Dybde:  | 47.736 cm |
| Højde:  | 0.193 cm  |

## Egenskaber

|                                        |                                                                                       |
|----------------------------------------|---------------------------------------------------------------------------------------|
| BIOS-type (Basic Input/Output System): | Intel                                                                                 |
| BIOS-egenskaber:                       | IPMI 2.0 support                                                                      |
| Hardware egenskaber:                   | Trusted Platform Module (TPM) 2.0, Intel Optane Memory Ready, BMC-fjernadministration |

## Ekspansion / Konnektivitet

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| Ekspansionsåbninger:   | 2 x CPU   32 x DIMM 288-pins (DDR4)   2 x PCIe 4.0 x32   1 x PCIe 4.0 x16 (OCP 3.0 modulsupport)                            |
| Grænseflade (lagring): | Intel C621A: SATA-600 / PCIe - stikforbindelser: 4 x mini-SAS HD, 2 x M.2 - 10 enheder - RAID 0 / RAID 1 / RAID 10 / RAID 5 |
| RAID-egenskaber:       | Software RAID 0 / 1 / 10 / 5                                                                                                |
| Interface:             | 3 x USB 3.0   2 x seriel   1 x VGA                                                                                          |
| Interne interfaces:    | 2 x USB 2.0 - intern stik   1 x USB 3.0 - intern stik                                                                       |
